
ENGINEERING TRAINEE DAYS

Since 2011, this project aims to **promote engineering and scientific professions** by giving you an insight into the daily work, professional, linguistic and relational requirements of a STEM professional.

The experiences you gain are fundamentally different from a company visit, as during the Engineering Trainee Days you accompany your trainee boss in his or her professional activity for two days.

Duration:
Two Days

Target:
Age 16 and older

Explore STEM careers – gain firsthand experience in engineering and scientific professions

Develop professional skills – understand workplace practices, communication, and teamwork

Build confidence – learn directly from professionals and experience real job responsibilities
